

ADSL Broadband

Whether you are looking to provide connectivity to your main office, satellite offices or home-workers; or add resilience to your current network infrastructure, our cost-effective ADSL broadband solution offers your business fast speeds, improved reliability and dedicated account management through our UK-based support team.

How ADSL broadband works

Depending on the quality of your line and exchange connection, we offer a range of ADSL technologies and hardware options for your business. Where possible, we automatically provide connectivity using the 21CN network, giving you access to the fastest speeds available.

| ADSL | ADSL2+ |
|----------------------------|-----------------------------|
| Download: up to 8Mb | Download: up to 20Mb |
| Upload: up to 400Kb | Upload: up to 1.2Mb |

How ADSL broadband benefit your business

| | |
|-------------------------------|---|
| Increased productivity | Our fast ADSL service is the perfect solution for transferring large amounts of data, accessing hosted cloud applications or video conferencing services. We also offer static IP addresses to run your own website, email server or Virtual Private Network (VPN) as standard. |
| Reliable connectivity | With service provisioning within six working days and 99.9% availability across our entire network, we'll make sure your connection works for your business. We also have specialist teams dedicated to proactive line monitoring with the aim to resolve faults before they have a chance to impact your connection. |
| UK-based support | Dedicated account management and completely unscripted customer and technical support. |
