

GDPR IT Help Sheet

What is GDPR?

The General Data Protection Regulation (GDPR) (Regulation (EU) 2016/679) is a regulation by which the European Parliament, the Council of the European Union, and the European Commission intend to strengthen and unify data protection for all individuals within the European Union (EU). It also addresses the export of personal data outside the EU.

Being a Strobe IT customer with an agreement means that some of this is taken care of for you, meaning you have nothing to worry about or do.

What IT Security Do I Need?

GDPR Requirements

- Desktop Antivirus
- Server Antivirus (if business contains server)
- OS Patch Management
- Third Party Application Updates
- Internet Router/Soho Firewall
- File and Folder Backup (for local and/or cloud)
- Email Backup
- Mobile Device Passcode
- Mobile Device locate and/or wipe
- Data Permissions

Going Beyond GDPR

- Email Encryption
- Desktop Encryption
- Mobile Device Encryption
- Smart/Next Gen Firewall
- DNS/Website Blockking
- Email Filtering
- Mobile Device VPN/DNS Blocking

If any of these advanced features are of interest, speak to us to see how they can help your business.

Please use the following tick sheet and decide if your protected!

- Desktop Antivirus**
This protection is designed to defend against viruses infecting your desktops and laptops which could lead to either data loss or data stolen.
- Server Antivirus**
This protection is designed to defend against viruses infecting your servers which could lead to either data loss or data stolen.
- OS Patch Management**
Your computers Operating System (OS) needs regular patching to make sure it gets all the latest features and well as improvements to prevent security holes. *[Included in computer support]*
- Third Party Application Updates**
Your computers Third Party Applications like Adobe Reader need regular updates to make sure it gets all the latest features as well as improvements to prevent security holes. *[Included in computer support]*
- Internet Router/Soho Firewall**
SOHO (Single Office/Home Office) Firewall Appliances are dedicated hardware/software solutions designed for small company or home networks. *[Standard Routers Provide This]*
- File and Folder Backup**
Standard backup of data located on local devices or cloud storage which is then kept in a safe location like a fireproof safe. *[Under server support backups are monitored for Success/Fail]*
- Email Backup**
Emails are a form of communication which contain data that identifies people, backing up of this data is important.
- Mobile Device Passcode**
Mobile devices that store copies of information like contacts, emails or have auto login systems to your data must be protected by a passcode, fingerprint or similar system.
- Mobile Device Locate/Wipe**
Mobile devices that store copies of information like contacts, emails etc must have a way of blocking their accesses, wiping the data from them or being able to locate them if lost or stolen.
- Data Permissions**
All data stored must only be accessible to the needed parties, so HR files for instance should only be accessible to a member of the HR team.
